

New Strategies for Keeping Schools Safe: Evidence-based Approaches to Prevent Youth Violence

Evidence-Based Practice, Measurement, and Accountability

David Osher, Ph.D.

Contributing Author, *Educational Researcher*
Vice President, American Institutes for Research

Capitol Hill Briefing
Thursday, April 8, 2010
Dirksen Senate Office Building

We Have Evidence-Based Practices Ready for Use in Schools

“there is strong evidence that universal, school-based programs decrease rates of violence...”

David Osher

We Have Evidence-Based Practices Ready for Use in Schools

- Anger management
- Bullying prevention
- Conflict resolution
- Family therapy
- Parenting skills
- Problem-solving
- Social competence
- Substance abuse resistance
- Etc.

We Have Evidence-Based Practices Ready for Use in Schools

School Discipline

- ⊕ As we have seen, schools typically respond to disruptive students with external discipline which include office referrals and corporal punishment as well as suspensions, and expulsions.
- ⊕ Scant evidence for punitive and exclusionary approaches
 - may be harmful for individuals and schools (Mayer, 1995; Skiba, Peterson, & Williams, 1997)
 - segregation of anti-social students with other anti-social students as well as suspension can make students more **anti-social** (Dishion & Dodge, 2005; Hemphill, Toumbourou, Herrenkohl, McMorris, & Catalano, 2006)
 - punishment can increase vandalism and student **disengagement** (Mayer, Butterworth, Nafpaktitis, & Suzer-Azaroff, 1983)

David Osher

Teaching and Teacher-Student Connection Matters

⊕ Engagement, motivation, and self-discipline are more effective (Osher et al., 2008) and self-discipline are

We Have Evidence-Based Practices Ready for Use in Schools

- ⊕ Non-experimental studies of the Virginia threat assessment model suggest that:
 - Most student threats resolved with counseling
 - Most threats not carried out
 - Almost all students can remain in school
 - Bullying reduced and school climate improves

Need Regular Measurement/Monitoring of School Safety and Order

☒ What To Measure?

Overall school climate

Student engagement

Student psychological well-being including their social and emotional capacities

Student and faculty perceptions of the school environment

Schools' capacity to efficiently provide academic and socio-emotional supports to meet the needs of all their students

Planning to Address Multiple Needs

School safety and order is a key ingredient in school improvement plans

Specialized support programs are essential for students who are academically at-risk

Likewise, related behavioral, social, and emotional support programs are essential to academic achievement and social development

(Osher, Bear, Sprague, & Doyle, 2010)

David Osher

Need Comprehensive Long-Term National Planning

- ⊖ Trans-disciplinary research is required to benefit from what is being learned across allied fields of study
- ⊖ Create a national school safety planning panel:
 - 1-year mission to develop 10-year plan
 - Membership from federal and state agencies, allied academic disciplines, and practitioners

(Mayer & Furlong, 2010)
