Shoulder Pain

Focused History

History of Present Illness

Caveat: Make sure shoulder pain is not referred pain from cardiac, pulmonary, or abdominal process. Also make sure it is not radicular from neck.

- Character/circumstance: Quality of pain; recent trauma, recent overuse, any recent immobilization of arm or hand for any reason (think frozen shoulder), recent infections of hand or arm?
- 2. **Exact location** prescription drugs, alternative therapies?
- 4. Radiation: Down arm or into neck or back.
- 5. Associated symptoms:
 - Ø Fever or chills, weakness?
 - Ø Numbness or tingling, weakness?
 - Ø Any other joints involved?
- 6. **Severity:** Rate (scale of 1–10). Interferes with sleep or work?
- 7. Timing:
 - ø Pattern: Constant or intermittent?
 - Ø Onset: Sudden or gradual?
 - ø Duration?
 - Ø Why is patient presenting now?
- 8. Relevant past medical history: Other musculoskeletal pains, drug allergies (always), any current medications.
- 9. **Relevant social history:** What is patient's concern about the pain? Occupation and hobbies, alcohol use (relevant if considering drug treatment).

Shoulder Pain

Focused Physical Exam

- 1. Vital signs
- 2. General appearance
- 3. **Systemic exam** if systemic symptoms indicate.
- Musculoskeletal: Examine other joints as indicated by history.

Shoulder inspection:

- Atrophy of arm or upper back muscles?(Compare to the other shoulder)
- Palpation: Heat, tenderness swelling, boney abnormality at AC joint, biceps tendon.
- Ø Range of motion, active and passive: Internal
